BUSINESS CONSULTING

Bellcrest Consultants are skilled and knowledgeable in core aspects of SAP , as well as the management of large-scales IT and Security projects.

PROCESS ENGINEERING

We deliver transformational solutions to our clients focusing on meeting their needs and delivering measurable service improvement and value.

Be the first to capitalise on emerging trends and technologies. Bring your ideas to market by optimising your SAP solution investment

Plan and execute your supply chain strategy on a global scale, while meeting the increasing demands of your digital business.

SAP S/4HANA is a real-time enterprise resource management suite for digital business built on advanced in-memory platform offering a personalised, consumer-grade user experience with SAP Fiori. SAP S/4HANA can drive instant value across all lines of business – no matter your industry or business size

Establish highly effective inventory planning and control while improving supply chain processes, inventory turnover, and costs.

Extract maximum value from your Big Data & business analytics technologies with the help of Big Data services and consulting experts.

Get 24/7 application monitoring and support. With our application services, a team of consultants experts proactively detects and fixes potential problems, immediately responds to incidents, handles software maintenance, and helps drive continuous improvements across your solution landscape. Let us help you manage solutions such as SAP S/4HANA, SAP Hybris, SAP SuccessFactors, SAP Ariba, SAP Concur, SAP Fieldglass, and the SAP HANA database.

PROJECT MANAGEMENT

We follow a clear, straightforward business strategy which is delivered by a flexible, pragmatic divisional operating structure for project success.

OUTSOURCING

Outsourcing of IT is aimed at relieving our clients from activities that are not directly linked to their line of business providing business assurance.

SAP SUPPORT

We understand just how much of your IT budget is being allocated toward maintaining application hence why we optimise your performance and cost.

CYBER SECURITY

Bellcrest Solutions, has a wealth of experience in the cyber security and risk management field. All of our consultants are qualified, experienced practitioners.

BE PROACTIVE...

Cyber security comprises technologies, processes and controls that are designed to protect systems, networks and data from cyber attacks. Effective cyber security reduces the risk of cyber attacks, and protects organisations and individuals from the unauthorised exploitation of systems, networks and technologies

PROTECT

We design and develop solutions that protect organisations and individuals from unauthorised exploitation of systems, networks and technologies.

THREAT PREVENTION

Our clients get solutions that provide clear proactive approach to cyber security employing cutting edge security tools to prevent security incidents from occurring.

HOW WE CAN HELP

LET US CREATE SECURE SOLUTIONS FOR YOU.

As part of our work with hundreds of private and public organisations in all industries, we have been carrying out cyber security projects for more than five years.

RISK ASSESSMENT

With our wealth of experience, we effectively assess your risks and provide mitigation options to minimise the potential for an occurrence.

SECURE SOLUTIONS

Safeguarding sensitive data using strong access controls is a critical to enabling information and data sharing across technology architectures.

SECURITY FRAMEWORK

We provide you with customised framework on identifying, assessing, preventing or mitigating security incidents within your organisation.

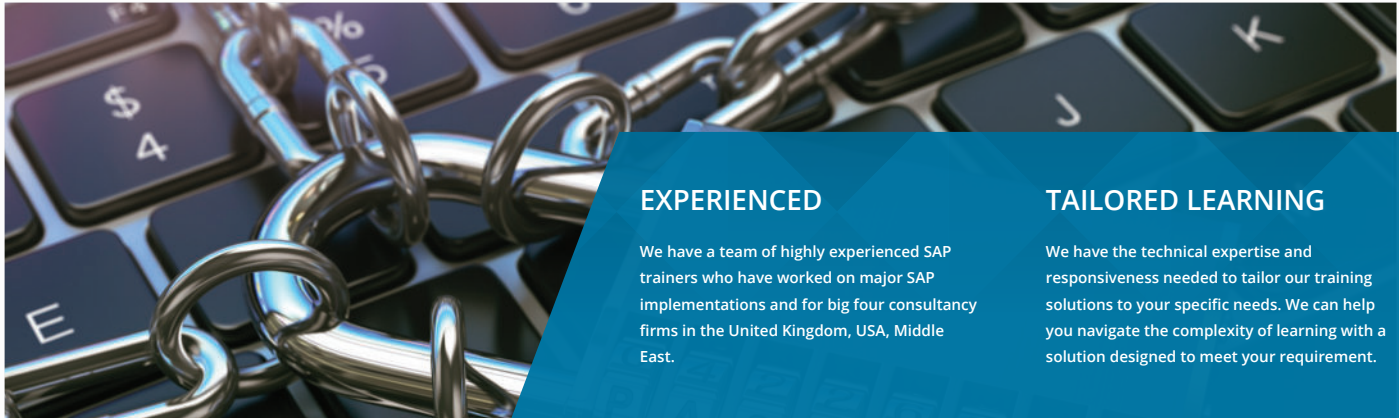

SAP Cybersecurity Framework provides you three-step roadmap towards the realisation of the ERP security processes: First we implement the framework, next we provide you with the sufficient level of security then we provision advanced automation giving you a total cutting-edge security capability.

SAP TRAINING

Bellcrest Solutions bring a wealth of experience to the SAP training industry with focus on cyber security and risk management. Our trainers are highly qualified and experienced practitioners.

LEARN TODAY, SUCCEED TOMORROW...

Bellcrest Solutions Limited is a leading SAP training provider organization based in London, UK. EXPERIENCED

We have a team of highly experienced SAP trainers who have worked on major SAP implementations and for big four consultancy firms in the United Kingdom, USA, Middle East.

TAILORED LEARNING

We have the technical expertise and responsiveness needed to tailor our training solutions to your specific needs. We can help you navigate the complexity of learning with a solution designed to meet your requirement.

OTHER TRAINING PROGRAMS

LET US HELP YOU ACHIEVE YOUR TRAINING GOALS.

What sets us apart from other training providers is our focus on delivering real-business experiences through our training modules.

PROJECT MANAGEMENT

Gain practical skills and knowledge to effectively plan, execute, and close projects with our comprehensive Project Management training course.

CYBERSECURITY

Protect your organization with our hands-on Cybersecurity training course, designed to equip you with essential skills and strategies.

ITIL 4 FRAMEWORK

Enhance your IT service management skills and improve business outcomes with our comprehensive ITIL 4 framework training course.

If you're looking for comprehensive training courses, Bellcrest Solutions Limited offers a compelling proposition with their highly experienced trainers, up-to-date curriculum, and real-business experiences. Choose Bellcrest Solutions for quality training that will prepare you for the demands of the industry.

CONTINUOUS AUDITING

Bellcrest, provides technology solutions that support the oversight and operation of enterprise wide risk management, continuous audit and compliance programs, with the overall objective being improvements in corporate governance.

NEVER MISS A THING...

A continuous audit driven system generates alarm triggers that provide notice about anomalies and errors detected by the system, it enables internal audit to continually gather from process data that support auditing activities. Bellcrest's CA enables internal auditors to determine more quickly and accurately where to focus attention and resources in order to better allocate audit resources and improve the quality of its audit as well as support of management.

PRECISION

With precision and focus, Bellcrest designs and develop lean and efficient continuous audit plans tailored to your organisation with the aim to achieve maximum impact.

ACT NOW!

The current environment of rising risk, regulatory activity and compliance costs make this the ideal time to consider Continuous Auditing (CA) in any establishment.

BECAUSE WE CARE

WHEN WE BUILD, WE BUILD TO LAST

Continuous Audit enables your internal audit to move from sampling some accounts and transactions to covering it all.

DATA ASSURANCE

Continuous data assurance verifies the integrity of data flowing through the information systems triggering alarms when significant discrepancies occur.

DATA GOVERNANCE

Considering security and privacy issues are also being addressed, preventing unauthorised access is built into CA using effective access controls.

RISK MONITORING

Continuous risk monitoring is used to dynamically measure risk and provide input for audit planning using real-time integrated risk assessment approach.

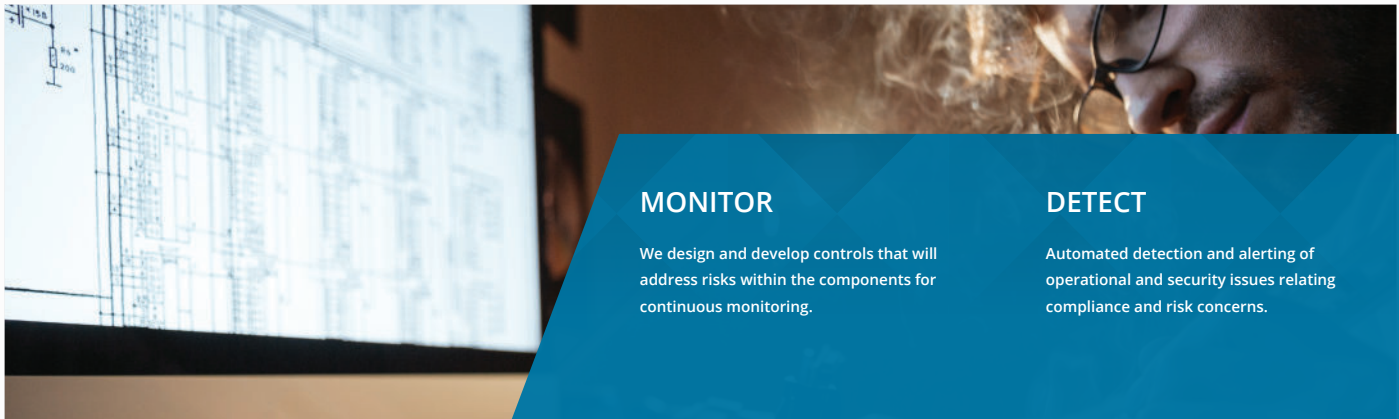

Bellcrest , will provide a technology solutions to support the operation of your entire organisation's risk management along with continuous audit and compliance programs, automated real time error checking and data verification providing notification to trigger action.

CONTINUOUS MONITORING

CM should not be viewed as a short-term project, but rather as a commitment to a new, more systematic approach. The resulting visibility also generate greater transparency for Directors, Investor and other Stakeholders.

TAKE IT UP A NOTCH...

Continuous monitoring is the process and technology used to detect compliance and risk issues associated with an organisation's financial and operational environment. The financial and operational environment consists of people, processes, and systems working together to support efficient and effective operations.

MONITOR

We design and develop controls that will address risks within the components for continuous monitoring.

DETECT

Automated detection and alerting of operational and security issues relating compliance and risk concerns.

WHY DO WE CARE?

WE BUILT IN THE WATCH TOWER..

Proactive corrective actions designed to reduce the cost of potential impact using alerts that notify you in real time on potential issues.

TAILORED ALERTS

Continuous monitoring and quick detection of security and compliance require prompt response for effectiveness.

TRANSACTION INSPECTION

Continuous monitoring systems can examine 100% of transactions and data processed in different applications and databases testing for inconsistencies.

CONTROLS MONITORING

Continuous controls monitoring consists of a set of procedures used for monitoring the functionality of internal controls relying on automated procedures.

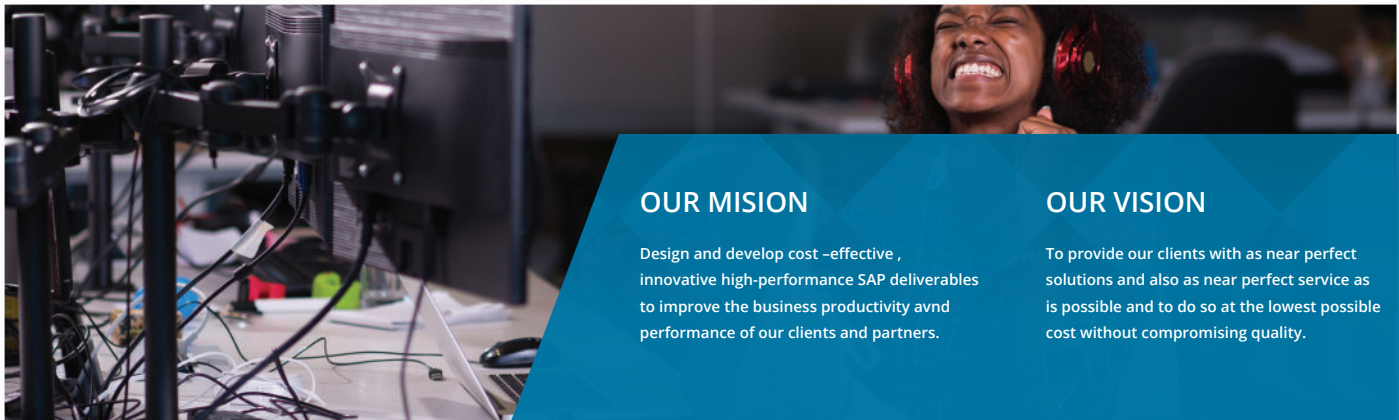

The implementation of continuous monitoring is a critical step in any successful risk management strategy, particularly for larger enterprises and government organisations. It establishes the ongoing collection and automated analysis of all log and event data, looking at all records of activity and performing real-time advanced correlation and pattern recognition.

SOLUTION ADOPTION

At Bellcrest Solutions , we're experts in developing user adoption methodologies that can help you identify an effective strategy for maximizing end-user adoption before you even start your project.

THE NEXT LEVEL...

A new software application can help drive your business forward. Used properly, key competitive advantages can be gained. However, without proper user adoption you risk spending time and capital to build something that will actually hinder your operations. All solutions should be developed using best practices in user experience design, but it takes more than that to succeed.

OUR MISION

Design and develop cost-effective , innovative high-performance SAP deliverables to improve the business productivity avnd performance of our clients and partners.

OUR VISION

To provide our clients with as near perfect solutions and also as near perfect service as is possible and to do so at the lowest possible cost without compromising quality.

OUR NAME IS ON IT!

DO MORE THAN BUILD A SOLUTION. GET IT ADOPTED!

You must market to the end-user. Developing a marketing plan and promotional strategy for internal staff is not a waste of energy.

CHANGE MANAGEMENT

Bellcrest Solutions help your business transition to a new way of doing things by ensuring the new way is noticeably better than the old.

INVOLVE USERS

Users being priority requires that we start with building personas to identify how main user groups interact with the system in their daily work

COMMUNICATION

Effective strategic communication is the key to successfully implementing large-scale organisational initiatives. It engages all stakeholders.

Site mapping, wire framing, prototyping and mock-ups can help ensure your system is built for usability. Launching a prototype to a select group will allow you to determine where fixes are needed, and to address any challenges before your general population uses the system.

THE PROJECTS

Simple Finance, on-premise edition is a new SAP HANA-based finance solution, which is available with SAP Business Suite 4 HANA, or SAP S/4HANA. Simple Finance allows companies to run trial balance sheets, P&L's and cash flow analysis any time of the day.

01. SAP S/4 HANA FINANCE

Finance organisations need to embrace the digital age to keep up with new and evolving business models and provide decision makers with instant insight. With SAP S/4HANA Finance, companies can create a common view of all financial and operational data, provide flexible, easily consumable reporting, automate processes—and instantly evaluate the financial implications of business options with real-time analytics, prediction, and simulation.

- Implementation Approach
- Detailed steps on complex migrations
- Predefined extraction & transformation
- Methods meet SAP S/4HANA requirements
- Clear Master Data Governance Strategy
- enhance productivity with SAP@S/4HANA

02. ARIBA PROJECT

Like any other major IT Implementation Program, Ariba Implementation is to be considered a business transformation

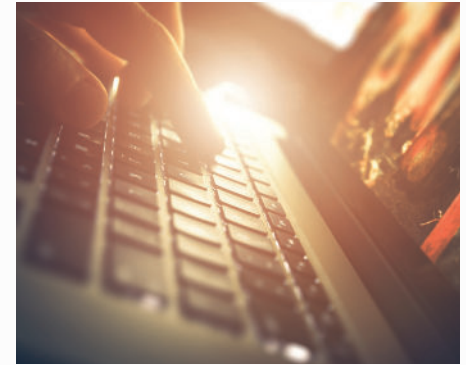

- Procurement Strategy
- Category Strategy and Buying Channels
- Business Transformation

03. SAP MDG PROJECT

SAP MDG is a state of the art master data management solution, providing out of the box domain specific master data governance.

- Deliver Out of the Box
- Integrated Object Model
- Governance, Collaboration & Data Quality

04. GREENFIELD SAP PROJECT

“Greenfield” or “Vanilla” implementation is the traditional way of implementing a SAP system. The team starts from best practices and designs the final ERP-solution.

- Standardized processes
- One homogeneous application solution
- Complete functionality
